

K-Love radio station is an amazing radio station and serves me well in my local community. I do not listen to secular radio stations, and therefore rely only on Christian radio stations; K-Love is the best and it is my favorite. I listen to it 95% of the time I listen to the radio. Not only does it encourage me in my life, but it does so for many other individuals and families in my area. There are few options for good, positive, enjoyable, up-lifting music and programming on the radio, and if K-Love were to be displaced by an LPFM broadcaster providing other programming, the effect on the community would be detrimental. When people are hurting and down, often they turn to their radios for comfort. K-Love provides that comfort by not only what they say and play, but also by what they do. They care about people and want to help them. People can call in and request prayer, and they do it. This changes lives! What we need in our community and in our nation as a whole is to lift each other up and encourage one another. This is exactly what K-Love does for our community. If this station is removed from the FM dial, fewer people will be reached, and then there will only be more of the same. The "same" I'm referring to is the music and programming played on other FM stations that at best keeps your spirit level, but usually just brings people down, whether they know it's happening or not. K-Love does just the opposite; it always brings people up whether they know it or not. The services K-Love provides to our community is in the public interest. When someone is encouraged because they've been listening to K-Love in the car, they have a tendency to pass on to others what K-Love has given to them. They might show the person who just cut in front of them some mercy and lay off the horn, or they might actually smile at someone and help them feel better, or even better, a mother and wife who has been lifted up by K-Love might be kinder to and happier with her husband and children. Like I said, the effect on the local community would be detrimental if K-Love were to be displaced by an LPFM broadcaster providing other programming. Please, leave K-Love where it is!!!
